EDUCATION

University of California, Los Angeles
Master of Engineering, Data Science — Sept 2026 - Present

University of Seoul
Bachelor of Science in Engineering, Computer Science — Feb 2022

RESEARCH

AI Security Research Intern, University of California, Los Angeles — Sept 2026 – Present
- Research AI safety and security under BruinSec Lab(Guided by Professor Yuan Tian), exploring Agent Safety, LLM Safety, and AI Society Safety.
- Currently, focusing on the measurement of Agents' Safety Alignment failure in the social environment.

Institute of Technology, Law&Policy Research Group, University of California, Los Angeles — Sept 2026 – Present
- Analyze research about the intersection of emerging technologies, focused on AI, and society from the law and policy perspective to ensure they are socially beneficial and accountable.

PROJECTS

Open Source Contributor, Hugging Face Korea Research Team — July 2024 – Present
- Contributed to code refactoring and translated 30+ official Hugging Face resources, including *Transformers* documentation.
- Organized the first Hugging Face Open Source Conference in Korea.
- Managed Hugging Face Korea's official community blog and published articles on AI research trends.
- Developed a vector-search agent system using the open-source smolagents library, providing practical implementation guidance for AI-powered search applications.

Agent Benchmark "Ko-AgentBench", **Hugging Face** Korea Research Team — July 2025 - Jan 2026
- Developed an open-source benchmark evaluating LLM agents' function-calling capabilities in Korean-language contexts, including a 7-level evaluation framework and agent scenario datasets.

EXPERIENCE

Software Engineer(Application Architect), GSITM — July 2025 - July 2026
- Conducted full-stack development of shared/common components, implemented and operated the CI/CD pipeline used across client projects
- Launched the company's first in-house tech newsletter; led weekly editing and publication of AI newsletters and AI seminars, facilitating AI capability awareness across the organization

Search Engine Solution Engineer, GSITM — Dec 2024- June 2025
- Designed and optimized a search engine for large-scale data processing using SQL, Java, OpenSearch, and Elasticsearch, and led redevelopment of a JSP-based search engine solution into React-based solution applying AI-powered tools for the first time, delivering a production system within 3 months with a 3-person team.

VDI Solution Engineer, GSITM — Jan 2024 -Nov 2024
- Designed virtualization environments using hardware(server, storage, switch) within Hyper-V and Active Directory environments, monitored computing resources (CPU, Memory, etc.), and performed system maintenance, managing 1,080+ virtual desktops

AWARDS AND SCHOLARSHIPS

Korea IT Business Promotion Association Award, Korea IT Business Promotion Association — Nov 2024
- Awarded for outstanding contributions to open source(Hugging Face), including code refactoring, bug fixes, creating AI educational content, and *Transformers library* document translation

Korean National Diplomatic Academy Model United Nation 2nd Place Aug 2021
- Recognized for excellence in diplomatic negotiation, public speaking, and resolution drafting.

College Student Youth Education Support Scholarship, University of Seoul July 2019 - July 2021
- Taught advanced high school-level mathematics to youth in underserved communities.

CONFERENCE

Hugging Face Korea Conference, *Hugging Face Korea* Research Team July 2026
- Arranged the first Hugging Face Community Conference in Korea

Grand Gathering, Pseudo Lab Jan 2026
PseudoCon, Pseudo Lab May 2025
- Arranged the non-governmental AI and Data Science Research Conference

VOLUNTEER

Interpreter, 19th YWCA Youth Conference: *"Rights of Women"* Jan 2019
Malawi Dental Clinic Project Fundraising & Research, GAiN Korea Aug 2021
Laos School Project Fundraising & Research, GAiN Korea Sept 2021
